

Usage Reports

Cluster Usage Reporting

View real-time job accounting on the cluster with [sacct](#) or job reporting for the last 30 days with [sreport](#).

Historical job accounting is available to DCC users through Tableau.

All job data is reported on the start day of the job (important for long running jobs).

登录到 Tableau at Duke

If you are member of multiple lab groups and need to update your default SLURM account for reporting information, please use:

```
sacctmgr modify user u=(NetID) set DefaultAccount=(account name)
```
